**Detailed Action**

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

**Claim Rejections - 35 U.S.C. § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-19 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the absence of a structural formula or chemical name, the following terms are seen to render the claims in which they appear indefinite in all occurrences: medicinal substance and medicinal preparation.

In claims 14-19, applicant recites a method of making a medicinal substance which is produced by homeopathic methods and has initial a chemical formula or composition identical with that of the said active substance. It is unclear as to how a compound that has the "identical" chemical formula as the active substance can be differentiated from the active substance and is not the active substance itself as products of identical chemical composition can not have mutually exclusive properties.

It is also unclear as to what the term "biolegically" means. Moreover, it is unclear what the terms "biolegically transferring information" mean within the context of the instant invention, specifically what is the actual medicinal substance and through what means, a mechanical device or the action of mixing, is the transfer of "information" accomplished between the potentiated substance and the material carrier/active substance. If applicant asserts that the biolegically transferred information is the active medicinal substance it further becomes unclear as to what

this unidentified "information" is chemically or structurally and how it is differentiated from the undefined potentiated medical substance.

**Claim Rejections - 35 U.S.C. § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20 - 25 are rejected under 35 U.S.C. § 102(b) as being anticipated by Ecanow, U.S. Patent No. 4,963,367.

Claims 20-25 are drawn to a medicinal preparation comprising an active medicinal substance in therapeutic dose and a potentiated homeopathic medicinal substance having a same chemical formula or composition as said active medicinal substance. Applicants inclusion of a process step wherefrom the medicinal substance is derived is not seen as relevant within the instant composition claims. The patentability in composition claims resides in the compound(s) thereof, no matter what method of production is set forth. A compound that has the "identical" chemical formula as the active substance can not be differentiated from the active substance. The open claim language also allows for the addition of common or suitable excipients or carriers. As such, applicant has made a claim to any compound of therapeutic nature. Ecanow anticipates these claims as it discloses a medicinal preparation comprising a material carrier and one or more active compounds dispersed in an aqueous solution (see claim 5 and p.1-3).

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1623

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
